Professional Summary

Mobile App Developer experienced in building full-stack cross-platform applications using Flutter, BLoC, Node.js, and MongoDB. Skilled in responsive UI development, REST API integration, secure authentication, and real-time features. Passionate about developing scalable, production-ready applications with clean architecture and high performance.

Technical Skills

Languages: Dart, JavaScript, Core Java, SQL

Frameworks: Flutter, Node.js, Express.js, BLoC

Backend: REST API, JWT, Firebase Authentication

Database: PostgreSQL, MongoDB, SQLite, Hive

Tools & IDE: Postman, Git, GitHub, Cloudinary, Vercel, Render, Railway, Netlify, Android Studio, VS Code

Projects

Yatrikaa – Travel Companion App | [GitHub](#)

Feb 2026

Tech-Stack: Flutter, Bloc, Node.js, Express.js, MongoDB, Firebase, JWT, Google Places API, OpenTripMap API, Render

- Built a full-stack travel app enabling users to discover destinations, plan trips, and explore nearby attractions
- Integrated Google Places and OpenTripMap APIs to deliver real-time destination details, maps, and nearby points of interest
- Designed secure backend APIs with role-based access control for managing users and trip data
- Added cloud image uploads, push notifications, trip planning, and favourites for a personalized user experience
- Delivered a responsive Flutter UI using BLoC architecture for a seamless cross-platform experience.

QLix – Real-Time Audience Engagement Platform | [GitHub](#)

April 2026

Tech-Stack: Flutter, Dart, BLoC, Node.js, Express.js, MongoDB, PostgreSQL, Socket.IO, Firebase, JWT

- Built a full-stack mobile app enabling hosts to run live polls, quizzes, and Q&A for meetings, classrooms, and events
- Enabled real-time participation via unique session codes, using Socket.IO for instant vote updates and live leaderboards
- Designed secure backend APIs with role-based access control for managing sessions, users, and content
- Added push notifications, attendance tracking, and session history to improve host and participant experience
- Delivered a responsive UI for Android and iOS with live analytics and participant management.

Education

B. Tech in Computer Science and Business System

KIT's College of Engineering, Kolhapur | *CGPA: 8.13*

2024–2027

Diploma in Information Technology

Government Polytechnic Ambad, Jalna | *Percentage: 86.94%*

2021–2024

Class X (SSC)

Z. P. High School, Chhatrapati Sambhajinagar | *Percentage: 85.40%*

2020–2021

Achievements

2nd Place – Mind Spark State-Level Project Exhibition

March 2023

- Led a team to design and develop a Faculty Feedback Management System, digitizing feedback collection for educational institutes.
- Competed against projects from colleges across the state, securing 2nd place, recognized for problem-solving, presentation, and technical implementation.

Experience & Leadership

Android Developer Trainee — Mountreach Solution Pvt. Ltd.

Jun 2023–Jul 2023

Contributed to "GuruConnect" an Android application, during a 2-month industrial training program. Gained hands-on experience in mobile application development, UI design, and application workflows, while strengthening problem-solving and software development skills through real-world project exposure.
